Allowable Subject Matter

Claims 1-33 are allowed.

The following is an examiner's statement of reasons for allowance: Strack et al et al '515 reference is considered to represent the most relevant state of the art, which discloses a method of determining formation resistivity comprising at least the steps of an iterative procedure using data from resistivity tool measurements and predicted resistivity responses from the formation models and adjusting the formation model until the deviation between the measured values and the predicted values fall within tolerance. The '515 reference however at least fails to teach or suggest that such procedure is to be used to determine the formation resistivity profile that can be used in steering the drilling tool, since obviously, the prior art reference is suggested to be used in a wireline operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank S. Tsay whose telephone number is (571) 272-7038. The examiner can normally be reached on Monday thru Friday, 7:30am-5:00 pm, 2nd Friday off.
